PROFILE

Technical Artist specializing in VFX, real-time shaders, and Game Feel for mobile and PC platforms. Experienced in optimizing game performance, bridging the gap between design and development, and creating high-polish visual effects that elevate player engagement.

TOOLS

ENGINE & SYSTEMS:

Unity
Shader Graph
Particle Systems
Feel (More Mountains)

ART & DESIGN:

Blender
Photoshop
Illustrator
Figma

VERSION CONTROL:

Git

EXPERIENCE

TECHNICAL ARTIST

Clover Bite | 2024-2026

Collaboration with Supersonic (Unity)

- **Game Feel & VFX:** Designed and implemented core game loop visual feedback, including custom VFX, screen shakes, and dynamic animations to maximize "WOW moments."
- **UI Integration & Animation:** Built, structured, and animated game screens (Victory/Loss, Pop-ups, Menus) within Unity, ensuring seamless performance and polished feedback.
- **Game Performance:** Optimized art assets and UI layouts, contributing to the success of Idle Zoo World by maintaining high performance, achieving 40% Day-1 Retention and a CPI under \$1.

Collaboration with Hoppa Play & Crazy Labs

- **Technical Art & Shaders:** Developed and integrated 2D visual effects, custom textures, and shaders using Unity Shader Graph across 4 published titles.
- **Rapid Prototyping:** Translated Game Design requirements into functional, high-polish Unity scenes under tight deadlines, streamlining the pipeline between designers and engineers.

EDUCATION

Game Design and Development

Tiltan School of Design & Visual Communication
2022-2025

- **Teaching Assistant:** Selected as a TA for the "Game Expression" course; responsible for developing course materials, grading, and delivering class presentations.
- **Studio Incubator Program:** Co-founded an extracurricular development team as the sole Technical Artist, securing a professional contract at Clover Bite studio.
- **Publisher Collaboration:** Advanced to a long-term studio role at Clover Bite during the third academic year, collaborating directly with Supersonic (Unity).
